Introduction

The Best Baseball on Earth!

You've got your hands on the finest baseball game money can buy! *HardBall III* from Accolade offers stunning realism, fabulous graphics and effortless gameplay.

You take total control of the field as players hit, run, field and steal bases. Your pitchers can sling everything from fastballs to sinkers, and the ump calls 'em like he sees 'em. There's even crowd noise and the crack of the bat! And for that extra "oomph" that takes you straight into the ball park, *HardBall III* is announced by Al Michaels, one of baseball's most noted broadcasters.

HardBall III is true to the traditions of the first official baseball game, played in Hoboken, New Jersey in June 1846. In the 150 years since, baseball gloves, balls, bats and uniforms have evolved and improved. Yet the game itself has changed very little, while still appealing to every generation! Today, millions of children, teens and adults play baseball every season, cheered on by tens of millions of fans!

Everybody talks baseball. It's the national pastime! And now, thanks to Accolade's *HardBall III*, you can play an incredibly realistic game right at home. You've got instant replay, life-like animation, complete statistics and a wide choice of players, clubs and stadiums. So choose your teams, set your starting lineups, grab a couple of hot dogs and let's play ball!

In the Booth with Al Michaels

Al Michaels is the best there is in the broadcast booth, with a voice known to sports lovers around the world. Al's been an avid sports fan since he was young, and audiences respond to that love of the game in his voice. His distinct broadcast style is loaded with facts and insights. When he announces a game, you get pulled into the play, actually feeling the tension on the field and the excitement in the stands.

Al began broadcasting in 1968. He's called football and basketball play-by-plays, reported on high school sports and hosted three television sports shows daily. In 1974, Al signed on as sportscaster for the San Francisco Giants, and in 1977 he accepted a broadcasting job with ABC Sports. He has been announcing sports for ABC ever since, including *Monday Night Football*, an astounding seven World Series, five All-Star Games, seven League Championship Series and four Olympic Games.

You'll find Al behind the mike at a variety of football and basketball telecasts, in addition to ABC's *Wide World of Sports* events. This top sports announcer has been selected as the national Sportscaster of the Year three times and has twice captured an Emmy Award as Outstanding Sports Personality - Host.

HardBall III needed the best sportscaster in the business to call the best baseball game there is. So when it came time to select a play-by-play announcer, there was really only one choice — Al Michaels.

Viewing Selection

You can view a game or batting practice from one of the following perspectives:

- **Pitcher/Batter:** You are automatically given the Pitcher view when you're on the mound, and the Batter view when you're at the plate. Ideal for one-player games. (In two-player games, the Home Team pitches from the Pitcher view, while the Visiting Team pitches from the Batter's view.)
- **Pitcher:** The view from behind the pitcher's mound. Highly recommended when you are pitching, so you'll get a good look at how a ball breaks.
- **Batter:** The view of the infield through the catcher's eyes. This view provides the batter with the best look at an incoming pitch.

Highlight the view you want and press **Button B**. A baseball appears next to your selection.

- **Closeups:** This feature lets you see close plays on the bases in a special "zoom" view. Highlight **Closeups** and press **Button B** to activate it. A baseball appears next to the option. To deactivate it, highlight it again and press **Button B**. Closeups can be active along with any one of the three views above.

League Play

It's time for the real thing. No more practice games. No more batting cage. In League Play, you can play anything from a short 13-game schedule to a regulation 162-game season.

You'll play a Stars Game at the half-way point of full and half seasons, and before post-season play in the short season, as well as League and World Championships when the season is over. (See **Playing the Stars Game** and **Post-Season Play**, pg. 51, for more information.)

Overview

League Play mode is the heart of *HardBall III*. Before you take the field on opening day, you'll need to make a few decisions. First, you'll probably want to buy and edit some of the teams in your league (up to two at a time). Then you'll need to pick a schedule: do you want to play a full 162-game season, half a season, or maybe just a short schedule? Once a season begins, you'll need to decide which games to play yourself, and which you'll let the computer play for you.

Overwhelming? Nah! Everything mentioned above is explained in the next few pages. So work in that glove, pine tar that bat, and sharpen those spikes. The season will be half over before you know it!

Buying & Selling a Team

How would it feel to own your own team and call all the shots? *HardBall III* lets you do just that. When you become a team owner, all league games involving your team must be played out rather than simulated (see **Playing a League Game**, pg. 48). To become a team owner:

1. Select **League Play** from the Main Menu.
2. Select the team you want to buy. The Team Summary screen appears.
3. Select **Buy Team**. The Keypad Editor appears.
4. Use the Keypad Editor to enter a manager's name for your team, and select **Done**.

Note: You can only own two teams at a time.

To sell a team:

- 1 Select your team on the League Play screen.
- 2 Select **Sell Team**. You no longer own that team.

Note: When you sell a team, any edits you made to that team, its players and pitchers will be lost. All settings will be restored to the original team supplied on your *HardBall III* cartridge. If you sell a team during a League Play season, the team and player statistics will continue to accumulate with the default team, and not be reset to zero.

Editing Teams

You can create a "dream team" by editing the roster of any of the 26 teams included in *HardBall III*. You must own a team before you can edit it or its players (see **Buying & Selling a Team**, pg. 35).

Note: For team, player and pitcher edits to be permanent, they must be done in League Play. Edits done in the Exhibition Game and Batting Practice will disappear when you leave those modes.

Five stats determine how well a player hits, fields and runs the bases. Think of each stat as an average of the player's previous performances.

- **Batting Average:** The higher the average, the more often the player will reach base.
- **Home Runs:** The higher the home run total, the better chance the player has of hitting one out.
- **RBIs** (runs batted in): The higher the number, the more reliable this player will be with runners in scoring position.
- **Stolen Bases:** If a player has a high number of stolen bases, there's a good chance he'll be successful stealing a base.
- **Errors:** If a player has a low number of errors, then his fielding will be mostly flawless.

Note: See the **Glossary** in this manual for definitions of the player's stat categories.

Each player has listed stats. To change them:

Enjoying League Play Highlights

You can save League Play highlights and enjoy them later, the same way you do for Exhibition Games. For instructions, please see **Enjoying Your Own Highlights**, pg. 33.

Playing the Stars Game

This mid-season classic is held at the half-way point of full and half seasons, and before post-season play in the short season. The Stars Game features a one game match-up of the best players from both leagues. *HardBall III* automatically selects the best players at each position, based on their current statistics. The Stars Game can be simulated or played in full just like any regular season game.

Post-Season Play

After a season is over, two rounds of playoff games begin. If two teams are tied for a division lead after a season is over, they will play a one-game playoff to determine the outright division winner. If more than two teams in a division are tied, two of the teams are randomly chosen to participate in the playoff game.

League Championships

The divisional winners in each league play a best-of-seven series (first team to win four games) to determine the League Champion. The team with the best record during the regular season will host four of the seven games. The League Champion will then advance to the World Championships against the winner of the other league.

World Championships

Both League Champions square off in a best-of-seven series to determine the World Champion. Again, the team with the best record during the regular season will host four of the seven games.

Note: Any or all League and World Championship games can be simulated or played in full, just like any regular season game.

Select **Homerun Derby** to activate it. A baseball appears next to the option. Then try your luck in the contest using the same button controls as for playing a game. (See **Play Ball!**, pg. 6)

Selecting Pitch Types

To select the type of pitch or pitches you want thrown:

- 1 Select any pitch in the Pitch Types box. A baseball will appear next to it.

 - **Inside/Outside:** Pitches will only be thrown to the inside and outside part of the strike zone.
 - **Random:** Pitches will be randomly thrown to all parts of the strike zone.
- 2 Select **OK** to save your changes, or **Cancel** to delete them.

- 1 Select **Start**. The playing field appears, with a batter, pitcher and catcher ready to go.
